CLIMATE CHANGE

Name The File:
periodclimatechangefirstinitiallastname

With the video editing software iMovie, you will be creating a **Public Service Announcement (PSA**) by using images from the internet, creating title slides and selecting appropriate music.

A Public Service Announcement is an educational TV commercial. The topic of the PSA is climate change.

To start a movie in iMovie, you need to do the following
1)Go to File
2)Select New Movie
3)Highlight No Theme
4)At the bottom right click on Create.
5)Name the movie (file->see above for how to name the movie)
6)Click OK

YOUR MOVIE WILL HAVE THE FOLLOWING SECTIONS.

1)Title Slide that says **Climate Change** (Make text and slide 4 seconds long)

2)Title Slide that says **Evidence** (Make text and slide 4 seconds) There should be a transition between the climate change slide and evidence slide.

3)At least 5 images that show evidence of global climate change. For each image do the following:

- Add a transition for the image
- Type in a phrase/sentence that describes image.
- Each image and text should be 5 seconds

4) Title Slide that says **Causes** (Make text and slide 4 seconds)

5)At least 5 images that show how you are causing global climate change. For each image do the following:

- Add a transition for the image
- Type in a phrase/sentence that describes image.
- Each image and text should be 5 seconds

6)Title slide that says **Solutions** (Make text and slide 4 seconds)

7)At least 5 images that show solutions of how you can slow your contributions of global climate change immediately and/or in the next year.. For each image do the following:

- Add a transition for the image.

- Type in a phrase/sentence that describes image.
- Each image and text should be 5 seconds

8)Title slide that says who created the PSA (Make text and slide 4 seconds)

9)Title slide that ends the movie. You decide what to put. (Make text and slide 4 seconds)

10) **The ending of your movie will give websites where images used in your movie were found. DO NOT JUST SAY THAT YOUR IMAGES WERE FROM GOOGLE OR THE INTERNET. I NEED THE SPECIFIC WEBSITE. For the slide with websites you will copy and paste your websites onto a powerpoint slide and then save the slide as a JPEG. Then you will put this JPEG into your movie. I will show you how to do this in class.**

IMAGES

NONE OF YOUR IMAGES CAN CONTAIN WORDS ON THEM!. When you find a picture make sure the file size is large. These will look best in your video.

For your images you will be creating a folder in your My Documents to store your pictures. **Please name your folder as follows:**

periodprojectfolderfirstinitiallastname

This is your **project folder.** You will be turning in this folder when you are done with the project.

As you save each image, rename it with a good name such as Evidence #1 Melting Glaciers.

CAPTIONS

CAPTIONS SHOULD DESCRIBE WHAT THE PICTURE IS SHOWING FOR EXAMPLE: STRONGER HURRICANES.

WORDS SHOULD BE BIG, COLORFUL, AND VERY EASY TO READ.

THEY SHOULD BE VISIBLE LONG ENOUGH TO READ THEM OUT LOUD AT LEAST TWO TIMES.

THE IMAGE SHOULD STIL BE CLEARLY VISIBLE BEHIND THE WORDS

MAKE SURE THE CAPTIONS APPEAR ONLY WHILE THAT IMAGE IS VISIBLE.
