

1.1 WHOLE NUMBER OPERATIONS

Essential Question: How do you know which operation to choose when solving a real-life problem?

4 MAIN OPERATIONS IN MATH

ADDITION	SUBTRACTION	MULTIPLICATION	DIVISION
all together combined in all perimeter sum total join	decreased by difference fewer than left less minus take away	of product times triple twice	dividend quotient average

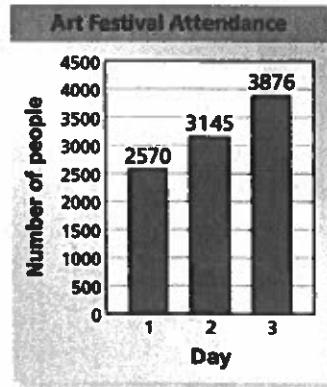

EXAMPLE 1

The bar graph shows the attendance at a 3-day art festival.

1) What is the total attendance for the art festival?

$$\begin{array}{r} 11 \\ 2570 \\ 3145 \\ +3876 \\ \hline 9591 \end{array}$$

The total attendance for the art festival is 9,591 people.

2) What is the increase in attendance from Day 1 to Day 2?

$$\begin{array}{r} 2145 \\ -2570 \\ \hline 575 \end{array}$$

The increase in attendance is 575 people.

EXAMPLE 2

A school lunch contains 12 chicken nuggets. Ninety-five students buy the lunch. What is the total number of chicken nuggets served?

$$\begin{array}{r} 112 \\ \times 95 \\ \hline 160 \\ 1080 \\ \hline 1140 \end{array}$$

There were 1,140 chicken nuggets served.

Find the value of the expression.

1) $1745 + 682$

$$\begin{array}{r} 1745 \\ +682 \\ \hline 2427 \end{array}$$

2) $912 - 799$

$$\begin{array}{r} 912 \\ -799 \\ \hline 113 \end{array}$$

3) 42×118

$$\begin{array}{r} 31 \\ 118 \\ \times 42 \\ \hline 236 \\ 4720 \\ \hline 4956 \end{array}$$

You want to find the number of groups of 24 in \$840.
